Re: Pagel's Pit Site--Remedial Design

Dear Mr. Nika:

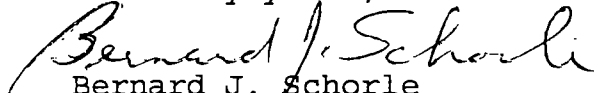

In the comments on the draft Groundwater RD Work Plan for the Pagel's Pit site from David Mick, it was pointed out that 35 IAC Part 620 applies to all groundwaters of the State. I am not sure what the comment is trying to convey. It is my belief that the Record of Decision dated June 28, 1991 fully presents what has to be done with regard to the groundwater around the site. The only thing additional that I believe might have to be done, because this is an operating landfill and it has to comply with the terms of its permit. would be something called for by 35 IAC 811 that has not been recognized at this time.

I have given this opinion to Alan Schmidt of Warzyn and he is going ahead with revising the document on this basis. If there is something additional that David Mick believes should be done, then it will be necessary to point it out more specifically. Would you please check on this?

I have not looked at 35 IAC Part 620; this is one of the regulations that I do not have that I asked you for in my June 7, 1993 letter. It would be helpful to have copies of these regulations.

If you have any questions, please call me (312-886-4746).

Sincerely yours,

Bernard J. Schorle
Remedial Project Manager
